

*The Rev. Henry Miles D. D. F. R. S. to
Mr. H. Baker F. R. S. on the same.*

Dear Sir,

*Read Feb. 15.
1749-50.* **T**HO' I have not Time to answer
your valuable Letter at present,
permit me to return you my sincere Thanks for it;
and at the same time to give you the best Answer
I can to that Part of it which does more immediately
require it.

I find, upon Inquiry, that the Earthquake on
Thursday last was felt in a Gentleman's House in this
Place, pretty sensibly, in two Chambers, and in another
over one of them, by a Tremor of the Wainscot and Utensils, and a small Shock succeeding;
but was not perceiv'd at the other End of the House,
in a Room on the same Story with the Chambers.
I should have thought, when it was felt so near us,
as about 150 Yards, our House, which I look upon
as very susceptible of Impressions, so as to be shaken
by the Winds, would have been affected: But if
it had, 'tis hardly possible but some of the Family
must have perceiv'd it, considering the Parts they
were in, and their being chiefly in a sitting Posture.
I conclude therefore it could not be very considerable here.
I have endeavour'd to learn whether it
extended any further to the South of us, but can
not yet find it did.

The Wind has been chiefly S. and S. W. for some
Months past, much longer than is usual at any Time
of the Year; and yet we have had but a small
Quantity

Quantity of Rain hereabout for the Season. — I give you, on the other Side, the State of the Barometer and Thermometer on the 8th, and two Days before and after that, as observed at *London* by my ingenious Friend Mr. *Canton*, and by myself here, at 2^h p. m. and at 8^h p. m. each Day. I shall only add, that Yesterday (the 13th) my Thermometer abroad at 1^h p. m. was at 59 = to 27° above the freezing Point: A Degree of Warmth exceeding what we had several Days in last *June*, at 2^h p. m. I shall write you again the first Opportunity, and am,

Tooting, Feb. 14, *Your, and the Royal Society's,*
1747-50.

most obedient Servant,

H. Miles.

At London.

VI.

Jo. Martyn M.D. to the President, concerning
the same.

S I R,

Chelsea, Feb. 14, 1749-50.

Read Feb. 15. 1749-50. **S**OME time ago I troubled you with some Account of an *Aurora Australis*†, which I hope you receiv'd: I now take the Liberty to mention the Earthquake, which happen'd on *Thursday* last, of which you have without doubt had many and better Accounts from other Places.

It was felt here at 40' after Noon. All the Houses were violently shaken, especially those which are nearest to the River. I was sitting in my Study, which fronts the SW up one Pair of Stairs. I imagin'd that something heavy had fallen down in the Room below me. The Servants, who happen'd to be dispersed in several Rooms, each of them thought one of the others had thrown down some heavy Chest or Cabinet. A Maid-Servant, who happen'd to be passing from one of the under Offices to another, felt the Ground shake under her. As the Place on which her Feet were was full 6 Feet below the
